**Subject:** MLPAComments: Package S

I am in disbelief at what you have done. After all the time and effort we went through actually thinking there was a chance you were listening and you just go right ahead and do what you want anyway. I can't believe you have turned out to be such traitors. Your entire package is nearly a carbon copy of the desires of the most extreme environmentalist in the world. What do you think is going to happen when you ask for fisherman input from the North or South? They're going to tell you FORGET IT, it's a big waste of time anyways. Your package S will certifiably wipe out the Morro Bay and Avila nearshore and spot prawn fisheries. You have taken 90% of the prime fishing areas. Why did I waste a year of my time trying to explain to you what was going on in the ocean? This whole process was a conspiracy paid for by the environmental community to get rid of the fisherman. Well Congratulations! Now only one more step to wipe us out - Get rid of the Commissioners that care about the fisherman, I suppose the thousands of letters to the Governor about Jim Kellog from the NRDC, Ocean Conservancy, and the other 100's of other environmentalist in this state are love letters. We are doomed. This state is getting crazier by the day. Tom and Sheri Hafer
